THE DRAGON

INTRODUCTION

Make your VICTORY GARDEN more decorative and interesting with Dahlias. In curtailing our acreage of dahlias and producing edibles for the War Effort, we have discarded many of the temperamental varieties, making our offerings this year the easiest to grow and most satisfactory group of dahlias for your needs.

We are this year condensing our catalog to 32 pages to conserve paper, and expect to use it for two years, publishing only a supplement for 1945. Therefore, kindly save this catalog.

We have a limited number of reprints of the **Cultural Instructions** in our 1942 catalog, and will be glad to include one of these with your order on request should you be a new customer and not already have a copy.

ORDER WITHOUT DELAY so that we may reserve your order. There is a shortage of stock this year, and a number of varieties have the notation, *Roots limited*. This means that a small supply of roots has been put aside for retail trade, but will be sold out before our regular shipping season starts. If your order is placed after mid-season, kindly give a second choice. Owing to the shortage of stock, kindly indicate on your order whether or not you want us to substitute.

It is our suggestion that you make a Victory Garden where you have been growing dahlias or would like to grow them. You can so arrange your rows that dahlias can be planted between your vegetables. You can grow any or all of the early vegetables by planting lettuce, onion sets, radishes, or early peas where dahlias should be planted later, and early beans, beets, carrots, etc. so that they will be between the dahlia rows. Double cropping, or rotation of crops, is good for the soil, and takes very little more fertilizer, but insects should be kept under control.

ROOTS

Dahlia roots are divisions of field-grown clumps of dahlias. Each root must contain at least one "eye" from which the plant grows. Sturdy stalks or plants and fine exhibition flowers grow from roots, and strong clumps harvested for the following season. As the planted root acts as a food storehouse for the

JEEP (Dahlia 85B), **Bloom 4 x 3, Bush 4 ft.** A striking Ball Dahlia of white suffused violet rose and tipped purple violet. The picture, taken November 1st, shows its ability to hold full centers until frost. The color, however, is much more pronounced in the early season than this picture shows. As the name implies, it is first on the spot, and blooms early and profusely. Certified at Storrs, and a novelty that is different and sure to please.

growing plant, the growth of the plant is thus stabilized under adverse growing conditions.

POT ROOTS

Pot roots are small clumps produced by plants grown mostly in 3" pots in the open during the late Summer, and transferred in the Fall to greenhouses where they are grown under controlled conditions, and allowed to ripen naturally by the end of December. Pot roots should not be judged adversely because of their size, as they will produce bushes and flowers equal to roots, and in many varieties even better clumps on digging. Many experienced growers prefer pot roots.

GREEN PLANTS

Green plants are sprouts or cuttings taken from clumps grown in especially built greenhouses; rooted in sand benches in air-conditioned propagating houses; potted and grown under greenhouse conditions until well established and then moved to cold frames for proper hardening off. When they reach you they are ready for planting.

Many hundreds of thousands have been grown and shipped by us, and our customers have found them highly satisfactory. They are, as you will notice in our lists, considerably cheaper than roots in the higher priced varieties.

Green plants will produce flowers equal to roots or pot roots when well grown for exhibition, but will not produce as large clumps for the following season. When properly grown, however, many varieties will produce nice clumps.

DahliaDel green plants, in our specially designed shipping box, have been successfully sent all over the United States. See "Notice on Green Plant and Rooted Cutting Shipments," page 31.

ROOTED CUTTINGS

Rooted cuttings are sprouts or cuttings grown exactly as described under green plants (see above) up to the point where a good root system has developed. Rooted cuttings are, this year, being produced and handled in a different way. They will be wrapped separately in live sphagnum moss and grown in this for a short period before shipping, and should be potted or planted out without removing the moss or disturbing the roots established in the moss. We expect this new type of cutting to take the place of plants to a greater extent than at present, especially on long distance shipments.

Rooted cuttings are 1/3 less in price than plants. We will probably be out of rooted cuttings of some of the new varieties as the season advances. However, we are growing some varieties that are not listed, so send in the list of ones in which you are interested and we will gladly advise you.

LANDSCAPE YOUR VICTORY GARDEN

With Small-flowering Dahlias, or better still plant early vegetables in your Dahlia Garden between the rows. Dahlias planted with other garden material produce quantities of cut flowers for home decoration and arrangements.

ORDER EARLY

This year, more than ever, we suggest ordering early, as stock of a number of the varieties listed in this Catalog will be depleted before the height of the planting season.

We also suggest that you check your stock in storage earlier this season than usual. Roots in some sections of the country are not keeping well, due to the unusual growing season, and there will be a general shortage of stock.

DAHLIADEL RECOMMENDATIONS

for your Victory Garden

If you were at Dahliadel and asked me to check a list of the most satisfactory varieties of dahlias for you to grow, you would probably say you wanted varieties that are not temperamental. Then you would ask for those easy to grow, that produce plenty of flowers good for cutting, house decoration, and exhibition—oh yes, you would want some of the big ones too that will be the envy of the neighborhood. Well, here they are.

With this table of recommended varieties you can pick the types and colors you like most. Where there is more than one, the top variety is the newer and likewise the higher priced one. Practically all of the 186 varieties have won prizes at Shows or Trial Grounds, and will do it again if properly grown and exhibited.

NOTICE ON GREEN PLANT AND ROOTED CUTTING SHIPMENTS

When roots and plants are ordered together, roots will be held and shipped with the plants unless otherwise specified. **25 cents** must be included with all plant and rooted cutting orders to cover **Special Delivery** except where there is no **Special Delivery** service at post office of destination; in which case, send **15 cents** for **Special Handling**. For the Duration, while Victory Garden Fertilizer is sold for food production, why not use Bone Meal and Potash, or substitute Wood Ashes for Potash? Wonderful dahlias have been grown with this old stand-by and you can do it again. Bone Meal can be furnished at the same price as Potash. Prices on larger quantities on request.

AMARYLLIS

Available all through the winter and early Spring. Usually grown for winter blooms in pots indoors. **Each 60¢; 4 Bulbs for \$2.00**

HARDY CHRYSANTHEMUMS

We have selected a representative list of Chrysanthemums noted for their vigorous growth and their adaptability to general garden conditions. We grow these varieties in quantities for the cut flower market following dahlias, and have found some of the greenhouse varieties very satisfactory in the garden.

Chrysanthemums for garden use need not be grown in rows, except where plants are desired primarily for cutting. They can be used in shrub borders in combination with perennials or late-flowering annuals, and planted 8 inches apart for this purpose. Varieties of varying height can be obtained to make colorful masses in the autumn landscape.

Culture is simple. Plant them in ordinary garden soil, giving them lots of water, and fertilize with a complete fertilizer once or twice during the growing season. For the black aphis, their worst pest, use a pyrethrum nicotine spray, the same as recommended for dahlias.

RHYTHM (Dozier-Dahliadel 86 A-B), 1943, 1C, Bloom 8-9x6, Bush 5 ft. Our 1943 sensational introduction that proved its worth doing its share of winnings from California to our Eastern Coast, even in the worst growing season. It has form and exquisite beauty, with its double serrated tips. The color is an unusual cameo pink suffused soft rose, with soft lemon shadings at the base of the petals and center of the flower. It is not one of the "big fellows," but a beautiful dainty flower with a unique form that just appeals to you. This dahlia has been awarded the Derrill W. Hart Memorial Gold Medal, the highest award a dahlia can receive for Trial Ground performance. It scored 85 at Storrs, 85 at East Lansing and 86½ at West Virginia, where one plant had seventeen flowers on the first day of judging. In 1940 this dahlia was a winner in the Camden and Baltimore Seedling Classes, and won an Achievement Medal in Camden. It did very well at Scranton Trials and Certified at Maryland Trial Grounds. It is a good root maker, and has rugged plant growth. Certainly a variety you don't want to miss.

Root, \$7.50; Pot Root, \$5.00; Plant, \$3.50

DAHLIA SEED

Sow in flats or frames in early spring in light soil, cover the seed not more than one-fourth inch about the same as you would tomato seed. When first pair of true leaves are well developed transplant into small pots or flats and grow in cool temperature until they can be planted in the garden. Should they get too large pinch back and shift to larger pots giving them room.

DAHLIA SEEDLINGS never come true to their parentage, but do usually show some similar characteristics in form, color or bush growth. You cannot grow seedlings of a named variety and produce the same variety.

CACTUS AND SEMI-CACTUS SEED (Dahliadel grown). A mixture made from good seed-bearing parents. 20 Seed, \$1.00; 100 Seed, \$5.00

DECORATIVE SEED (California grown). A mixture made from good seed-bearing parents. 20 Seed, \$1.00; 100 Seed, \$5.00

CACTUS AND DECORATIVE SEED (California grown). Mixed. 20 Seed, \$1.00; 100 Seed, \$5.00

MIXED MINIATURE SEED (Dahliadel grown). A mixture of very fine Decorative, Cactus and Peony type Miniature dahlias. 35 Seed, \$1.00

ORCHID FLOWERING SEED (Dahliadel grown). Produces Orchid flowering dahlias consistently for us, with some type and considerable color variations. 35 Seed, .50; 100 Seed, \$1.00
